No. 6-3A, Jalan Desa Putera 43/KS 08, Pusat Perniagaan Desa Putera Jalan Kebun, 41200 Klang, Selangor Darul Ehsan.
Tel : +603-5167 3161, +603-5167 3261 Fax : +603-5167 3262

Foamcrete Cornice JV Sdn Bhd manufactures a comprehensive range of light weight decorative concrete products which includes Light Weight Concrete Coping (name as **LWC Coping** in short form) which are used for interior & exterior decoration. The product types include cornice, dentil, motif, hood, sill, coping, keystone, arch and corbel. Below shows the product properties which are non combustible light weight concrete wrapped with fiberglass mesh and coated with foamcrete cement.

Features & Advantages Of Light Weight Concrete Coping (LWC Coping)

1. It is non combustible.
2. It is neat, beautiful and don't need highly skilled worker to make wooden formwork (conventional method) and plaster.
3. Its installation time is much shorter compare to that of conventional method.
4. It is sawable and easy to cut to required length.
5. Any damage to its surface can be repaired with foamcrete cement.
6. It can be tailored made to many aesthetic shape or profile,
